

YELLOW WEATHER WARNING ISSUED

1st November 2023

Storm Ciarán: Preparation

Balfour Beatty

 **Herefordshire Council**

Working for Herefordshire

Yellow warning of rain

Starts: 18:00 GMT on Wed 1 November **Ends:** 23:59 GMT on Thu 2 November

Our emergency response teams are on standby following yellow weather warnings issued by the Met Office.

Due to the recent wet weather and already saturated ground, we are preparing for further localised flash flooding and other hazards that may occur on the county's roads.

Drainage

We operate a system of regular drain clearance and maintenance across the county, however, in heavy and persistent rain, drainage systems can quickly reach capacity and flash flooding can still occur. Residents with concerns about drainage in their area can report [highways drainage issues online](#).

Stay Informed

Safety is a shared responsibility. We encourage Herefordshire residents to stay informed about weather forecasts and local advisories. Our team provides updates on road closures or other issues on the network on our [Facebook](#) and [X \(formerly Twitter\)](#) pages @HfdsStreets.

To report an urgent highways safety issue, always call 01432 261800.

Impact on the Service

Weather conditions and flooding may impact on the normal capital and revenue programme. This may result in projects and schemes being delayed or rescheduled. Please follow our social media channels for the latest updates. If you have any queries, please contact customer services on 01432 261 800. being delayed or rescheduled. Please follow our social media channels for the latest updates. If you have any queries, please contact customer services on 01432 261 800.
